Filter Discussion

- What Are Filter Requirements? Is it to:
  1. See things I don't want to see on my low-bit-rate device?
  2. On-the-fly select certain messages (e.g., a thread, all messages from Glenn, etc.)?
- First requirement addressed by SIEVE
- Second requirement today addressed by client
  - Do we really need to have the capability to do selection at the server?
  - Do we really need to do this work now?

Moving Process Forward

- Coherent Proposal for Quick Reconnect Strategy

  – In Charter, Needs to Be Selected

- Requirements Document for Server-to-Client Notifications

  – Not In Charter
